Land Development Plan Guidelines for Commercial Recycling Infrastructure based on Proposed Use

Commodity	Cardboard (OCC)	Glass	Metal	Plastic	Paper
		Clear	Steel	PET #1	Newspaper
		Brown	Bi-Metal	HDPE #2	Mixed Office
		Green/Blue	Aluminum		Phonebooks
	↓				Magazines
Method of Collection	Dumpster/Customer Provided Container	CCSWA Blue Carts (3)	CCSWA Blue Cart	CCSWA Blue Cart	CCSWA Blue Cart

Standalone Restaurant, no bar: Dumpster facilities should accommodate a regular refuse dumpster and an OCC Dumpster. Also, there should be space for 3 - 4 recycling carts for METAL and PLASTIC and possibly GLASS.

Bar or Restaurant/Bar: Dumpster facilities should accommodate a regular refuse dumpster and an OCC Dumpster. Also, there should be space for a **minimum** of 5 recycling carts for the three types of GLASS, METAL and PLASTIC.

Small/Medium Retail: Dumpster facilities should accommodate a regular refuse dumpster and an OCC Dumpster or customer provided container. Also, there should be space for a minimum of 3 Carts for Mixed Paper and metal and plastic containers.

Large Retail: Dumpster facilities should accommodate a regular refuse dumpster or refuse compactor. If OCC is not being bailed internally, space for an OCC dumpster or compactor is also warranted. Also, there should be space for a minimum of 4 recycling carts for METAL and PLASTIC and MIXED PAPER.

Class 1 Office Space: Dumpster facilities should accommodate a regular refuse dumpster. OCC is not required unless light manufacturing or light assembly is anticipated. Also, there should be space for a minimum of 4 recycling carts for METAL and PLASTIC and MIXED PAPER.

Residential Multiunit: Curbside collection is most appropriate. However, if a community center or dumpster area exists, it should be sized for a regular refuse dumpster and space for minimum of 6 recycling carts for the three types of GLASS, METAL PLASTIC and PAPER. OCC can be placed into or next to the MIXED-PAPER cart.

Industrial: Dumpster facilities should accommodate a regular refuse dumpster and an OCC Dumpster. Based on the industry, additional recycling carts may or may not be warranted.

Mixed Use: Dumpster facilities should have space for regular and OCC dumpsters. Also, space for 6 carts is warranted if a large mixed use design is planned.
