

Plastic Bag Recycling

Types that can be recycled:

- Grocery store grocery bags
- Newspaper sleeves (clear, orange, white or yellow only)
- Dry cleaning bags
- 100% clean produce bags, including bags containing lettuce, carrots and potatoes
- Ziploc bags only if the top locking section is removed

Guidelines:

- Plastic bags should be clean and dry; no food particles or liquids
- Coloring on the bags make it harder for the mix to remain clear when making recycled plastic products
- If the bag contains more coloring than clear, discard in the garbage
- Remove paper from plastic bags if advertisements/coupon attached
